

## SHPE

*Networking*

### What is it?

The Society of Hispanic Professional Engineers (SHPE) is the nation's largest association dedicated to career development and leadership for students and professionals in all types of STEM fields (not just engineering).

### How does it help you?

SHPE can help you build your professional network, find a job through career fairs, and find mentorship in the STEM field. SHPE has over 13,000 members, many of whom are DREAMers, and dozens of member companies.

### How to sign up?

Receive the benefits of a large, well-connected, national organization with a personal, local emphasis on what you need right now (resume building, career center) by joining one of 200 student chapters across the nation. Undergrad membership fee is \$10. You do not have to be Hispanic to join.

To connect with your college's student chapter, go here

<https://www.shpe.org/students/student-chapters>

If your college does not have a student chapter you may start one or join the national organization directly via <https://www.shpe.org/membership>

Deadline: n/a

Year in College: Any

Work Authorization Required: No for membership; Yes for promoted internships and jobs
